## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-10 are pending in this Office Action.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Minamino (US 5,787,395).

As per claim 1, Minamino teaches, “a speech recognition apparatus comprising”:

“an acoustic processing section for converting an input speech signal given as a time-series signal into a feature vector and outputting a plurality of dissected frames” (Fig. 10, element 102);

“a word model producing section for producing at least one word model based on a recognition object word prepared beforehand and an acoustic model” (Fig. 11);

“a matching processing section for performing matching processing for collating said at least one word model with said feature vector for each word by using a Viterbi algorithm which obtains a final cumulative probability along a state sequence giving a maximum probability” (col. 28, line 53 to col. 29 line 8); and

“a maximum value memorizing section for memorizing a maximum value in each frame of a score calculated based on the probability for a plurality of states contained in said plurality of frames” (col. 26, lines 1-19), wherein

"said matching processing section selects a calculation object state in which a score is to be calculated from said plurality of states based on the maximum value of the score and performs thinning-out processing for omitting calculation of scores for the states not selected as said calculation object state"(col. 26, lines 20-27).

***Allowable Subject Matter***

4. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
